Notes to the financial statements for the year ended 31st March, 2021

#### 1 CORPORATE INFORMATION

Suprajit Automotive Private Limited ('the Company') is a private limited Company domiciled in India and is incorporated under the provisions of Companies Act, 1956. The company is registered as 100 % EOU. The Company is engaged in the manufacturing and selling of Automotive cables and part thereof. The Company caters to both domestic and international markets. Suprajit Automotive Private Limited is a wholly owned subsidiary of Suprajit Engineering Limited, a listed entity.

# 2 Summary of significant accounting policies

# 2.1 BASIS OF PREPARATION OF IND AS FINANCIAL STATEMENTS

The financial statements of the Company have been prepared in accordance with Indian Accounting Standards (Ind AS) notified under the Companies (Indian Accounting Standards) Rules, 2015 and relevant amendment rules issued there after

Financial statements have been prepared and presented under the historical cost convention, on the accrual basis of accounting except except derivative Financial instruments and current investments have been measured at fair values at the end of each reporting period. The accounting policies have been applied consistently over all the periods presented in these financial statements.

Financial statements are prepared and presented in Indian Rupees and all amounts have been presented in millions with two decimals, unless otherwise stated.

#### 2.2 CURRENT VERSUS NON-CURRENT CLASSIFICATION

The Company presents assets and liabilities in the balance sheet based on current/ non-current classification. An asset is treated as current when it is:

- ▶ Expected to be realised or intended to be sold or consumed in normal operating cycle
- ► Held primarily for the purpose of trading
- ▶ Expected to be realised within twelve months after the reporting period, or
- ► Cash or cash equivalent unless restricted from being exchanged or used to settle a liability for at least twelve months after the reporting period

All other assets are classified as non-current.

#### A liability is current when:

- ▶ It is expected to be settled in normal operating cycle
- ▶ It is held primarily for the purpose of trading
- ▶ It is due to be settled within twelve months after the reporting period, or
- ▶ There is no unconditional right to defer the settlement of the liability for at least twelve months after the reporting period

The Company classifies all other liabilities as non-current.

Deferred tax assets and liabilities are classified as non-current assets and liabilities.

The operating cycle is the time between the acquisition of assets for processing and their realisation in cash and cash equivalents.

Based on the nature of products/ activities of the Company and the normal time between acquisition of assets and their realization in cash or cash equivalents, the Company has determined its operating cycle as 12 months for the purpose of classification of its assets and liabilities as current and non-current.

Notes to the financial statements for the year ended 31st March, 2021

#### 2 3 FOREIGN CURRENCIES

The Ind As financials statements are presented in Indian Rupees (INR or Rs.) which is Company's functional and presentation currency. Initially, foreign currency transactions are recorded at the exchange rate prevailing on the date of transaction.

Monetary assets and liabilities denominated in foreign currencies are translated at the functional currency spot rates of exchange at the reporting date applicable exchange rates.

Exchange differences arising on settlement or translation of monetary items are recognised in the statement of profit or loss. All non-monetary items which are carried in terms of historical cost denominated in a foreign currency are reported using exchange rate at the date of transaction. All non-monetary items which are carried at fair value denominated in foreign currency are reported using the exchange rates that existed when the fair value was determined. The gain or loss arising on translation of non-monetary items measured at fair value is treated in line with the recognition of the gain or loss on the change in fair value of the item (i.e., translation differences on items whose fair value gain or loss is recognized in other comprehensive income ("OCI") or the statement of profit or loss are also recognised in OCI or the statement of profit or loss, respectively).

In determining the spot exchange rate for initial recognition of the related asset, expense or income (or part of it) on the derecognition of a non-monetary asset or non-monetary liability relating to advance consideration, the date of the transaction is the date on which an entity initially recognises the non-monetary asset or non-monetary liability arising from the advance consideration. If there are multiple payments or receipts in advance, then the entity must determine the date of the transactions for each payment or receipt of advance consideration.

#### 2.4 FAIR VALUE MEASUREMENT

The Company measures financial instruments, such as, derivatives at fair value at each balance sheet date.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either:

- ▶ In the principal market for the asset or liability, or
- ▶ In the absence of a principal market, in the most advantageous market for the asset or liability

The principal or the most advantageous market must be accessible by the Company.

The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their economic best interest.

A fair value measurement of a non-financial asset takes into account a market participant's ability to generate economic benefits by using the asset in its highest and best use or by selling it to another market participant that would use the asset in its highest and best use.

The Company uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximising the use of relevant observable inputs and minimising the use of unobservable inputs.

All assets and liabilities for which fair value is measured or disclosed in the financial statements are categorised within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

- ▶ Level 1 Quoted (unadjusted) market prices in active markets for identical assets or liabilities
- ▶ Level 2 Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable
- ► Level 3 Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable

The Company's management determines the policies and procedures for both recurring and non - recurring fair value measurement. External valuers are involved, wherever considered necessary.

For the purpose of fair value disclosures, the Company has determined classes of assets and liabilities on the basis of the nature, characteristics and risks of the asset or liability and the level of the fair value hierarchy, as explained above. This note summarizes accounting policy for fair value and the other fair value related disclosures are given in the relevant notes.

Notes to the financial statements for the year ended 31st March, 2021

#### 2.5 REVENUE RECOGNITION

Revenue from contracts with customers is recognized upon transfer of control of promised goods/ products to customers at an amount that reflects the consideration to which the Company expect to be entitled for those goods/ products. To recognize revenues, the Company applies the following five-step approach:

- Identify the contract with a customer,
- Identify the performance obligations in the contract,
- Determine the transaction price,
- Allocate the transaction price to the performance obligations in the contract, and
- Recognize revenues when a performance obligation is satisfied.

Revenue from sale of goods is recognized upon transfer of control of promised goods to customers at an amount that reflects the consideration to which the Company expects to be entitled for those goods. Revenue is recognized to the extent

that it is probable that the economic benefits will flow to the Company and the revenue can be reliably measured, regardless of when the payment is being made.

Revenue from the sale of goods is measured at the fair value of the consideration received or receivable, net of returns and allowances.

The following specific recognition criteria must also be met before revenue is recognized:

#### Sales of Products

Revenue is recognised at the time of transfer of property in goods, which results in or coincides with the transfer of controls to the customers and is generally as per terms of contract with customers and no significant uncertainty exist regarding the amount of consideration towards such sale. Revenue is measured at the fair value of the consideration received or receivable, net of returns and allowances, trade discounts and volume rebates. Revenue from scrap is recognised on sale.

#### Interest income

Interest income is recognized using the effective interest rate method. The effective interest rate is the rate that discounts estimated future cash receipts through the expected life of the financial asset to the gross carrying amount of the financial asset. Interest income is included under the head "other income" in the statement of profit and loss.

#### **Export entitlements**

Export entitlements in the form of Merchandise Export from India Scheme (MEIS) is recognized in the statement of profit and loss when the right to receive credit as per the terms of the scheme is established in respect of exports made and when there is no significant uncertainty regarding the ultimate collection of the relevant export proceeds.

#### **Tooling Income**

Tools are manufactured through our vendors as per the design specified by the customer which is approved on the basis of the customer acceptance. Management has used judgement in identification of the point in time where the tools are deemed to have been accepted by the customer.

#### 2.6 GOVERNMENT GRANTS AND SUBSIDIES

Government grants are recognised where there is reasonable assurance that the grant will be received and all attached conditions will be complied with. When the grant relates to an expense item, it is recognised as income on a systematic basis over the periods that the related costs, for which it is intended to compensate, are expensed. When the grant relates to an asset, it is recognised as income in equal amounts over the expected useful life of the related asset.

When the Company receives grants of non-monetary assets, the asset and the grant are recorded at fair value amounts and released to profit or loss over the expected useful life in a pattern of consumption of the benefit of the underlying asset i.e. by equal annual instalments. When loans or similar assistance are provided by governments or related institutions, with an interest rate below the current applicable market rate, the effect of this favorable interest is regarded as a government grant. The loan or assistance is initially recognised and measured at fair value and the government grant is measured as the difference between the initial carrying value of the loan and the proceeds received. The loan is subsequently measured as per the accounting policy applicable to financial liabilities.

Notes to the financial statements for the year ended 31st March, 2021

#### 2.7 Taxes

#### Current Income Tax

Tax Expense comprises of current tax and deferred tax and is recognised in the statement of profit and loss. Current income tax assets and liabilities is the amount of income tax determined to be payable/recoverable in respect of taxable income as computed in accordance with the Income Tax Act, 1961 enacted in India. The tax rates and tax laws used compute the amount are those that are enacted to at the reporting Current income tax relating to items recognised outside the statement profit or loss is recognised outside the statement of profit or loss (either in OCI or in equity in correlation to the underlying transaction). Management periodically evaluates positions taken in the tax returns with respect to situations in which applicable tax regulations are subject to interpretation and establishes provisions, where appropriate.

#### Deferred Tax

Deferred tax is provided using the liability method on temporary differences between the tax bases of assets and liabilities and their carrying amounts for financial reporting purposes at the reporting date.

Deferred tax liabilities are recognised for all taxable temporary differences, except:

- ▶ When the deferred tax liability arises from the initial recognition of goodwill or an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the accounting profit nor taxable profit or loss.
- ▶ In respect of taxable temporary differences associated with investments in subsidiaries, associates and interests in joint ventures, when the timing of the reversal of the temporary differences can be controlled and it is probable that the temporary differences will not reverse in the foreseeable future.

#### **Deferred Tax Asset:**

Deferred tax is provided using the liability method on temporary differences between the tax bases of assets and liabilities and their carrying amounts for financial reporting purposes at the reporting date. Deferred tax liabilities and assets are recognized for all taxable temporary differences and deductible temporary differences, except:

- when the deferred tax liability or asset arises from the initial recognition of an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the accounting profit nor taxable profit or loss; and
- in respect of taxable temporary differences and deductible temporary differences associated with investments in subsidiaries, when the timing of the reversal of the temporary differences can be controlled and it is probable that the temporary differences will not reverse in the foreseeable future.

Deferred tax assets are recognised to the extent that it is probable that taxable profit will be available against which the deductible temporary differences, and the carry forward of unused tax credits and unused tax losses can be utilized. The carrying amount of deferred tax assets is reviewed at each reporting date and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred tax asset to be utilised. Unrecognised deferred tax assets are re-assessed at each reporting date and are recognised to the extent that it has become probable that future taxable profits will allow the deferred tax asset to be recovered.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply in the year when the asset is realised or the liability is settled, based on tax rates (and tax laws) that have been enacted or substantively enacted at the reporting date. Deferred tax relating to items recognised outside the statement of profit and loss is recognised outside the statement of profit and loss (either in OCI or in equity in correlation to the underlying transaction).

Deferred tax assets and deferred tax liabilities are offset, if a legally enforceable right exists to set-off current tax assets against current tax liabilities and the deferred tax assets and deferred taxes relate to the same taxable entity and the same taxation authority.

Notes to the financial statements for the year ended 31st March, 2021

#### Goods and Services Tax paid on acquisition of assets or on incurring expenses:

When the tax incurred on purchase of assets or services is not recoverable from the taxation authority, the tax paid is recognised as part of the cost of acquisition of the asset or as part of the expense item, as applicable. Otherwise, expenses and assets are recognized net of the amount of GST paid. The net amount of tax recoverable from, or payable to, the taxation authority is included as part of receivables or payables in the balance sheet.

#### 2.8 PROPERTY, PLANT AND EQUIPMENT AND INTANGIBLE ASSETS INCLUDING CWIP

Property, plant and equipment, capital-work-in progress is stated at cost, net of accumulated depreciation and accumulated impairment losses, if any. Such cost includes the cost of replacing part of the plant and equipment and borrowing costs for long-term construction projects, if the recognition criteria are met. When significant parts of plant and equipment are required to be replaced at intervals, the Company depreciates them separately based on their specific useful lives. Likewise, when a major inspection is performed, its cost is recognised in the carrying amount of the plant and equipment as a replacement, if the recognition criteria are satisfied. All other repair and maintenance costs are recognised in the statement of profit or loss as incurred. Spare parts, stand-by equipment that meet the definition of property, plant and equipment are capitalised at cost and depreciated over their useful life. Otherwise, such items are classified as inventory. Cost of assets not ready for intended use, as on the balance sheet date, is shown as capital work in progress.

Depreciation is calculated on a straight-line basis over the useful lives of the assets, as specified in Schedule II to the Act except in case of certain assets wherein depreciation is calculated on a straight-line basis using the rates arrived at based on the useful lives estimated by the management, supported by independent technical evaluation by professionals that considered shift wise working as well. The management believes that these estimated useful lives are realistic and reflect fair approximation of the period over which the assets are likely to be used.

Machinery spares are depreciated over the useful life of plant and equipment or useful life of spare part, whichever is less

An item of property, plant and equipment and any significant part initially recognised is derecognised upon disposal or when no future economic benefits are expected from its use or disposal. Any gain or loss arising on de-recognition of the asset (calculated as the difference between the net disposal proceeds and the carrying amount of the asset) is included in the statement of profit and loss when the asset is derecognised.

Notes to the financial statements for the year ended 31st March, 2021

The residual values, useful lives and methods of depreciation of property, plant and equipment are reviewed at each financial year end and adjusted prospectively, if appropriate.

#### 2.9 BORROWING COSTS

Borrowing costs directly attributable to the acquisition, construction or production of an asset that necessarily takes a substantial period of time to get ready for its intended use or sale are capitalised as part of the cost of the asset. All other borrowing costs are expensed in the period in which they occur. Borrowing costs consist of interest and other costs that an entity incurs in connection with the borrowing of funds. Borrowing cost also includes exchange differences to the extent regarded as an adjustment to the borrowing costs.

#### 2.10 LEASES

The determination of whether an arrangement is or contains a lease is based on the substance of the arrangement at the inception of the lease. The arrangement is or contains a lease if fulfilment of the arrangement is dependent on the use of a specific asset or assets and the arrangement conveys a right to use the asset or assets, even if that right is not explicitly specified in an arrangement.

The Company has adopted the new accounting standard Ind AS 116 "Leases" on April 1, 2019 as per Companies (Indian Accounting Standards) amendment Rules, 2019, notified by MCA on March 30, 2019. Ind AS 116 is a single lessee accounting model and sets out the principles for the recognition, measurement, presentation and disclosure of leases for both lessees and lessors. On application of IndAS 116, the nature of expenses has changed from lease rent in previous periods to depreciation cost for the right-of-use assets(RoU), and finance cost for interest accrued on lease liability.

The land is allotted by the holding Company "Suprajit Engineering Ltd" for expansion of production facility. The holding Company hands over the land to the Company on "right of use basis" on payment of monthly lease payments.

A contract is, or contains, a lease if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration.

#### As a lessee

At the commencement date of the lease the Company recognizes a lease liability measured at the present value of the lease payments that are not paid at that date. The lease payments included in the measurement of the lease liability consist of the payments for the right to use the underlying assets during the lease term that are not paid at the commencement date of the lease.

The payments included in the measurement of the lease liability include fixed payments less any lease incentives receivable variable lease payments that depend on an index or a rate, initially measured using the index or rate as at the commencement date, residual value guarantees, exercise price of a purchase option where the Company is reasonably certain to exercise that option and payments of penalties for terminating the lease, if the lease term reflects the lessee exercising an option to terminate the lease. GST liability is included in the measurement of the lease liability.

The lease payments are discounted using the interest rate implicit in the lease, if that rate is readily determined, if that rate is not readily determined, the lease payments are discounted using the incremental borrowing rate.

The Company recognizes a right-of-use asset from a lease contract at the commencement date of the lease, which is the date that the underlying asset is made available for use. The cost of the right-of-use assets comprises the amount of the initial measurement of the lease liability, any initial direct costs incurred and any lease payments made at or before the commencement date of the lease less any lease incentives received. Subsequently, the right-of-use assets is measured at cost less any accumulated depreciation and accumulated impairment losses, if any and adjusted for any re measurement of the lease liability.

The right-of-use assets is depreciated using the straight-line method from the commencement date over the shorter of lease term or useful life of right-of-use asset.

It also considers possible asset retirement obligations in the cost of the right-of-use asset. Right-of-use assets are subject to impairment testing in future periods.

Notes to the financial statements for the year ended 31st March, 2021

The Company has also applied the following practical expedient provided by the standard when applying Ind AS 116.

- a) By measuring the assets at an amount equal to the lease liability, adjusted by the amount of any prepaid or accrued lease payment recognized immediately before date of initial applications.
- b) not to reassess whether a contract is or contains a lease, accordingly the definition of lease in accordance with Ind As 17 will continue to be applied to those leases entered or modified before April 1, 2019.
- (c) The Company has applied a single discount rate to a portfolio of leases of similar assets in similar economic environment, consequently, the Company has recorded the lease liability at the present value of remaining lease payments, discounted using the incremental borrowing rate at the date of initial application.
- (d) excluded the initial direct costs from measurement of the RoU asset
- (e) Not to recognize RoU assets and lease liabilities for leases with less than twelve months of lease term and low-value assets on the date of initial application.

#### 2 11 INVENTORIES

Inventories are valued at the lower of cost and net realisable value. Costs incurred in bringing each product to its present location and condition are accounted for as follows:

Raw materials and components, stores and spares, consumables, packing materials, tooling in process:

Cost includes cost of purchase and other costs incurred in bringing the inventories to their present location and condition. However, materials and other items held for use in the production of inventories are not written down below cost if the finished products in which they will be incorporated are expected to be sold at or above cost.

Finished Goods and Work in Progress:

Cost includes cost of direct materials and labour and a proportion of manufacturing overheads based on the normal operating capacity, but excluding borrowing costs.

Cost is determined on a weighted average basis. Net realizable value is the estimated selling price in the ordinary course of business, less estimated cost of completion and the estimated costs necessary to make the sale.

Notes to the financial statements for the year ended 31st March, 2021

#### 2.12 IMPAIRMENT OF NON - FINANCIAL ASSETS

The Company assesses, at each reporting date, whether there is an indication that an asset may be impaired. If any indication exists, or when annual impairment testing for an asset is required, the Company estimates the asset's recoverable amount. An asset's recoverable amount is the higher of an asset's or cash-generating unit's ("CGU") fair value less costs of disposal and its value in use. Recoverable amount is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets or groups of assets. When the carrying amount of an asset or CGU exceeds its recoverable amount, the asset is considered impaired and is written down to its recoverable amount.

In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. In determining fair value less costs of disposal, recent market transactions are taken into account. If no such transactions can be identified, an appropriate valuation model is used. These calculations are corroborated by valuation multiples, quoted share prices for publicly traded companies or other available fair value indicators.

The Company bases its impairment calculation on detailed budgets and forecast calculations, which are prepared separately for each of the Company's CGUs to which the individual assets are allocated. These budgets and forecast calculations generally cover a period of five years. For longer periods, a long-term growth rate is calculated and applied to project future cash flows after the fifth year. To estimate cash flow projections beyond periods covered by the most recent budgets/forecasts, the Company extrapolates cash flow projections in the budget using a steady or declining growth rate for subsequent years, unless an increasing rate can be justified. In any case, this growth rate does not exceed the long-term average growth rate for the products, industries, or country in which the entity operates, or for the market in which the asset is used.

Impairment losses of continuing operations, including impairment on inventories, are recognised in the statement of profit and loss.

For assets excluding goodwill, an assessment is made at each reporting date to determine whether there is an indication that previously recognised impairment losses no longer exist or have decreased. If such indication exists, the Company estimates the asset's or CGU's recoverable amount. A previously recognised impairment loss is reversed only if there has been a change in the assumptions used to determine the asset's recoverable amount since the last impairment loss was recognised. The reversal is limited so that the carrying amount of the asset does not exceed its recoverable amount, nor exceed the carrying amount that would have been determined, net of depreciation, had no impairment loss been recognised for the asset in prior years. Such reversal is recognised in the statement of profit or loss, unless the asset is carried at a revalued amount, in which case, the reversal is treated as a revaluation increase.

# 2.13 PROVISIONS

Provisions are recognised when the Company has a present obligation (legal or constructive) as a result of a past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. When the Company expects some or all of a provision to be reimbursed, for example, under an insurance contract, the reimbursement is recognised as a separate asset, but only when the reimbursement is virtually certain. The expense relating to a provision is presented in the statement of profit and loss net of any reimbursement.

If the effect of the time value of money is material, provisions are discounted using a current pre-tax rate that reflects, when appropriate, the risks specific to the liability. When discounting is used, the increase in the provision due to the passage of time is recognized as a finance cost.

#### 2.14 RETIREMENT AND OTHER EMPLOYEE BENEFITS

Retirement benefit in the form of provident fund is a defined contribution scheme. The Company has no obligation, other than the contribution payable to the provident fund. The Company recognizes contribution payable to the provident fund scheme as an expense, when an employee renders the related service. If the contribution payable to the scheme for service received before the balance sheet date exceeds the contribution already paid, the deficit payable to the scheme is recognized as a liability after deducting the contribution already paid. If the contribution already paid exceeds the contribution due for services received before the balance sheet date, then excess is recognized as an asset to the extent that the pre-payment will lead to a reduction in future payment or a cash refund.

Notes to the financial statements for the year ended 31st March, 2021

The Company operates a defined benefit gratuity plan in India, which requires contributions to be made to a separately administered fund i.e. Employee's Group Gratuity cum Life Assurance Scheme of Life Insurance Corporation of India. The cost of providing benefits under the defined benefit plan is determined using the projected unit credit method. Remeasurements, comprising of actuarial gains and losses, the effect of the asset ceiling, excluding amounts included in net interest on the net defined benefit liability and the return on plan assets (excluding amounts included in net interest on the net defined benefit liability), are recognised immediately in the balance sheet with a corresponding debit or credit to retained earnings through OCI in the period in which they occur. Re-measurements are not reclassified to the statement of profit or loss in subsequent periods.

Net interest is calculated by applying the discount rate to the net defined benefit liability or asset. The Company recognizes changes in the net defined benefit obligation which includes service costs comprising current service costs, past-service costs, gains and losses on curtailments and non-routine settlements; and net interest expense or income, as an expense in the statement of profit and loss.

Accumulated leave, which is expected to be utilized within the next twelve months, is treated as short-term employee benefit. The Company measures the expected cost of such absences as the additional amount that it expects to pay as a result of the unused entitlement that has accumulated at the reporting date. The Company treats accumulated leave expected to be carried forward beyond twelve months, as long-term employee benefit for measurement purposes. Such long-term compensated absences are provided for based on the actuarial valuation using the projected unit credit method at the year-end. The Company presents the leave as a current liability in the balance sheet, to the extent it does not have an unconditional right to defer its settlement for twelve months after the reporting date. Where the Company has the unconditional legal and contractual right to defer the settlement for a period beyond twelve months, the same is presented as non-current liability.

#### 2.15 SHARE BASED PAYMENTS

Certain Employees of the company are granted stock appreciation rights of holding company, which are settled in shares (equity-settled transactions).

#### Equity-settled transactions:

The cost of equity-settled transactions is determined by the fair value at the date when the grant is made using an appropriate valuation model. That cost is recognised, together with a corresponding increase in Employee Share Appreciation Rights (ESAR) liability in other financial liability, over the period in which the performance and/or service conditions are fulfilled in employee benefits expense. The cumulative expense recognised for equity-settled transactions at each reporting date until the vesting date reflects the extent to which the vesting period has expired and the company's best estimate of the number of equity instruments that will ultimately vest. The statement of profit and loss expense or credit for a period represents the movement in cumulative expense recognised as at the beginning and end of that period and is recognised in employee benefits expense.

Service and non-market performance conditions are not taken into account when determining the grant date fair value of awards, but the likelihood of the conditions being met is assessed as part of the company's best estimate of the number of equity instruments that will ultimately vest. Market performance conditions are reflected within the grant date fair value. Any other conditions attached to an award, but without an associated service requirement, are considered to be non-vesting conditions. Non-vesting conditions are reflected in the fair value of an award and lead to an immediate expensing of an award unless there are also service and/or performance conditions.

No expense is recognised for awards that do not ultimately vest because non-market performance and/or service conditions have not been met. Where awards include a market or non-vesting condition, the transactions are treated as vested irrespective of whether the market or non-vesting condition is satisfied, provided that all other performance and/or service conditions are satisfied.

Notes to the financial statements for the year ended 31st March, 2021

# 2.16 FINANCIAL INSTRUMENTS

#### Initial recognition and measurement

All financial assets are recognised initially at fair value plus, in the case of financial assets not recorded at fair value through profit or loss, transaction costs that are attributable to the acquisition of the financial asset. Purchases or sales of financial assets that require delivery of assets within a time frame established by regulation or convention in the market place (regular way trades) are recognised on the trade date, i.e., the date that the Company commits to purchase or sell the asset.

#### Subsequent measurement

For purposes of subsequent measurement, financial assets are classified in below categories:

- ▶ Debt instruments at amortised cost
- ▶ Debt instruments at fair value through other comprehensive income (FVTOCI)
- ▶ Debt instruments, derivatives and equity instruments at fair value through profit or loss (FVTPL)
- ▶ Equity instruments measured at fair value through other comprehensive income (FVTOCI)

#### Debt instruments at amortised cost

A 'debt instrument' is measured at the amortised cost if both the following conditions are met:

The asset is held within a business model whose objective is to hold assets for collecting contractual cash flows; and

Contractual terms of the asset give rise on specified dates to cash flows that are solely payments of principal and interest (SPPI) on the principal amount outstanding.

After initial measurement, such financial assets are subsequently measured at amortised cost using the effective interest rate (EIR) method. Amortised cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. The EIR amortisation is included in finance income in the statement of profit or loss. The losses arising from impairment are recognised in the statement of profit or loss. This category generally applies to trade and other receivables.

#### Debt instrument at FVTOCI

A 'debt instrument' is classified as at the FVTOCI if both of the following criteria are met:

The objective of the business model is achieved both by collecting contractual cash flows and selling the financial assets;

Contractual terms of the asset give rise on specified dates to cash flows that are solely payments of principal and interest (SPPI) on the principal amount outstanding.

Notes to the financial statements for the year ended 31st March, 2021

Debt instruments included within the FVTOCI category are measured initially as well as at each reporting date at fair value. Fair value movements are recognized in the other comprehensive income (OCI). However, the Company recognizes interest income, impairment losses & reversals and foreign exchange gain or loss in the statement of profit or loss. On derecognition of the asset, cumulative gain or loss previously recognised in OCI is reclassified from the equity to statement of profit or loss. Interest earned whilst holding FVTOCI debt instrument is reported as interest income using the EIR method.

#### Debt instrument at FVTPL

FVTPL is a residual category for debt instruments. Any debt instrument, which does not meet the criteria for categorization as at amortized cost or as FVTOCI, is classified as at FVTPL.

In addition, the Company may elect to designate a debt instrument, which otherwise meets amortized cost or FVTOCI criteria, as at FVTPL. However, such election is allowed only if doing so reduces or eliminates a measurement or recognition inconsistency (referred to as 'accounting mismatch'). The Company has not designated any debt instrument as at FVTPL.

Debt instruments included within the FVTPL category are measured at fair value with all changes recognized in the statement of profit or loss.

#### **Equity investments**

All equity investments in scope of Ind AS 109 are measured at fair value. Equity instruments which are held for trading and contingent consideration recognised by an acquirer in a business combination to which Ind AS103 applies are classified as at FVTPL. For all other equity instruments, the Company may make an irrevocable election to present in other comprehensive income subsequent changes in the fair value. The Company makes such election on an instrument-by-instrument basis. The classification is made on initial recognition and is irrevocable.

If the Company decides to classify an equity instrument as at FVTOCI, then all fair value changes on the instrument, excluding dividends, are recognized in the OCI. There is no recycling of the amounts from OCI to Profit and Loss, even on sale of investment. However, the Company may transfer the cumulative gain or loss within equity.

Equity instruments included within the FVTPL category are measured at fair value with all changes recognized in the statement of Profit and Loss.

#### **Derecognition**

A financial asset (or, where applicable, a part of a financial asset or part of a Company of similar financial assets) is primarily derecognised (i.e. removed from the balance sheet) when:

- (a) The rights to receive cash flows from the asset have expired, or
- (b) The Company has transferred its rights to receive cash flows from the asset or has assumed an obligation to pay the received cash flows in full without material delay to a third party under a 'pass-through arrangement; and either (a) the company has transferred substantially all the risks and rewards of the asset, or (b) the company has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset.

Continuing involvement that takes the form of a guarantee over the transferred asset is measured at the lower of the original carrying amount of the asset and the maximum amount of consideration that the company could be required to repay.

### Impairment of financial assets

In accordance with Ind AS 109, the Company applies expected credit loss (ECL) model for measurement and recognition of impairment loss on the following financial assets and credit risk exposure

Financial assets that are debt instruments, and are measured at amortised cost e.g., loans, debt securities, deposits, trade receivables and bank balance

The Company follows 'simplified approach' for recognition of impairment loss allowance on Trade receivables. The application of simplified approach does not require the Company to track changes in credit risk. Rather, it recognises impairment loss allowance based on lifetime ECLs at each reporting date, right from its initial recognition.

For recognition of impairment loss on other financial assets and risk exposure, the Company determines that whether there has been a significant increase in the credit risk since initial recognition. If credit risk has not increased significantly, twelve month ECL is used to provide for impairment loss. However, if credit risk has increased significantly, lifetime ECL is used. If, in a subsequent period, credit quality of the instrument improves such that there is no longer a significant increase in credit risk since initial recognition, then the entity reverts to recognizing impairment loss allowance based on twelve month ECL.

Notes to the financial statements for the year ended 31st March, 2021

Lifetime ECL are the expected credit losses resulting from all possible default events over the expected life of a financial instrument. The 12-month ECL is a portion of the lifetime ECL which results from default events that are possible within 12 months after the reporting date.

ECL is the difference between all contractual cash flows that are due to the Company in accordance with the contract and all the cash flows that the Company expects to receive (i.e., all cash shortfalls), discounted at the original EIR.

When estimating the cash flows, an entity is required to consider:

All contractual terms of the financial instrument (including prepayment, extension, call and similar options) over the expected life of the financial instrument. However, in rare cases when the expected life of the financial instrument cannot be estimated reliably, then the entity is required to use the remaining contractual term of the financial instrument.

Cash flows from the sale of collateral held or other credit enhancements that are integral to the contractual term.

#### Financial liabilities

#### Initial recognition and measurement:

All financial liabilities are recognised initially at fair value and, in the case of loans and borrowings and payables, net of directly attributable transaction costs.

The Company's financial liabilities include trade and other payables, loans and borrowings including financial guarantee contracts and derivative financial instruments.

#### Subsequent measurement:

The measurement of financial liabilities depends on their classification, as described below:

#### (a.) Financial liabilities at fair value through profit or loss:

Financial liabilities at fair value through profit or loss include financial liabilities held for trading and financial liabilities designated upon initial recognition as at fair value through profit or loss. Financial liabilities are classified as held for trading if they are incurred for the purpose of repurchasing in the near term. This category also includes derivative financial instruments entered into by the company that are not designated as hedging instruments in hedge relationships as defined by Ind AS 109. Separated embedded derivatives are also classified as held for trading unless they are designated as effective hedging instruments.

Gains or losses on liabilities held for trading are recognised in the profit or loss.

Financial liabilities designated upon initial recognition at fair value through profit or loss are designated as such at the initial date of recognition, and only if the criteria in Ind AS 109 are satisfied. For liabilities designated as FVTPL, fair value gains/ losses attributable to changes in own credit risk are recognized in OCI. These gains/ loss are not subsequently transferred to P&L. However, the company may transfer the cumulative gain or loss within equity. All other changes in fair value of such liability are recognised in the statement of profit or loss. The company has not designated any financial liability as at fair value through profit and loss.

# (b.) Loans and borrowings

After initial recognition, interest-bearing loans and borrowings are subsequently measured at amortised cost using the EIR method. Gains and losses are recognised in profit or loss when the liabilities are derecognised as well as through the EIR amortisation process.

Amortised cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. The EIR amortisation is included as finance costs in the statement of profit and loss. This category generally applies to borrowings.

## (c.) Financial guarantee contracts

Financial guarantee contracts issued by the Company are those contracts that require a payment to be made to reimburse the holder for a loss it incurs because the specified debtor fails to make a payment when due in accordance with the terms of a debt instrument.

Financial guarantee contracts are recognised initially as a liability at fair value, adjusted for transaction costs that are directly attributable to the issuance of the guarantee. Subsequently, the liability is measured at the higher of the amount of loss allowance determined as per impairment requirements of Ind AS 109 and the amount recognised less cumulative amortisation.

Notes to the financial statements for the year ended 31st March, 2021

#### Derecognition:

A financial liability is derecognised when the obligation under the liability is discharged or cancelled or expires. When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as the derecognition of the original liability and the recognition of a new liability. The difference in the respective carrying amounts is recognised in the Statement of profit and loss.

#### 2.17 DERIVATIVE FINANCIAL INSTRUMENTS

The Company uses derivative financial instruments, such as foreign currency forward contracts and currency and interest rate SWAP to hedge its foreign currency and interest rate risks. Such derivative financial instruments are initially recognised at fair value on the date on which a derivative contract is entered into and are subsequently re-measured at fair value. Derivatives are carried as financial assets when the fair value is positive and as financial liabilities when the fair value is negative. Any gains or losses arising from changes in the fair value of derivatives are taken directly to statement of profit and loss.

#### 2.18 CASH AND CASH EQUIVALENTS

Cash and cash equivalents in the balance sheet and cash flow statement comprise cash at banks and on hand and short-term deposits with an original maturity of three months or less, which are subject to an insignificant risk of changes in value.

#### 2,19 CONTINGENT LIABILITIES AND CONTINGENT ASSETS

A contingent liability is a possible obligation that arises from past events and whose existence will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the Company; or a present obligation that arises from past events but is not recognized because it is not probable that an outflow of resources embodying economic benefits will be required to settle the obligation; or the amount of the obligation cannot be measured with sufficient reliability. The Company does not recognize a contingent liability but discloses its existence in the Ind AS financial statements unless possibility of out flow of resources remote.

Contingent assets are not recognized in the financial statements. If the inflow of economic benefits is probable, then it is disclosed in the financial statements.

#### 2.20 EARNINGS PER SHARE

Basic earnings per share is calculated by dividing the net profit or loss for the period attributable to equity shareholders (after deducting preference dividends and attributable taxes) by the weighted average number of equity shares outstanding during the period. The weighted average number of equity shares outstanding during the period is adjusted for events such as bonus issue, bonus element in a rights issue, share split, and reverse share split (consolidation of shares) that have changed the number of equity shares outstanding, without a corresponding change in resources.

# Diluted earnings per share:

Diluted earnings per share adjust the figures used in the determination of basic earnings per share to take into account:

- the after income tax effect of interest and other financing costs associated with dilutive potential equity shares, and
- the weighted average number of additional equity shares that would have been outstanding assuming the conversion of all dilutive potential equity shares

#### 2.21 EXCEPTIONAL ITEMS

When an item of income or expense within profit or loss from ordinary activity is of such size, nature or incidence that their disclosure is relevant to explain the performance of the Company for the year, the nature and amount of such items is disclosed as exceptional items.

#### 2.22 SEGMENT REPORTING

The Company prepares its segment information in conformity with the accounting policies adopted for preparing and presenting the financial statements of the Company as a whole.

#### 2.23 SIGNIFICANT ACCOUNTING JUDGMENTS, ESTIMATES AND ASSUMPTIONS

The preparation of the Ind AS financial statements requires management to make judgements, estimates and assumptions that affect the reported amounts of revenues, expenses, assets and liabilities, and the accompanying disclosures, and the disclosure of contingent liabilities. Uncertainty about these assumptions and estimates could result in outcomes that require a material adjustment to the carrying amount of assets or liabilities affected in future periods. The judgements, estimates and assumptions management has made which have the most significant effect on the amounts recognized in the Ind AS financial statements are explained in relevant notes in the financial statements. The Company has entered into lease for land, with lease term of 29 years.

Notes to the financial statements for the year ended 31st March, 2021

- I. Useful lives of property, plant and equipment: Determination of the estimated useful life of Property Plant and Equipment and the assessment as to which components of the cost may be capitalised. Useful life of Property Plant and Equipment is based on technical assessment made by technical expert and management estimate which are different from the useful life prescribed in Schedule II to the Companies Act, 2013. Assumption also needs to be made, when company assesses, whether as asset may be capitalised and which components of the cost of the assets may be capitalised.
- II. Provisions and liabilities: Provisions and liabilities are recognized in the period when it becomes probable that there will be a future outflow of funds resulting from past operations or events that can reasonably be estimated. The timing of recognition requires application of judgement to existing facts and circumstances which may be subject to change. The amounts are determined by discounting the expected future cash flows at a pre-tax rate that reflects current market assessments of the time value of money and the risks specific to the liability.
- **III. Contingencies**: In the normal course of business, contingent liabilities may arise from litigation and other claims against the Company. Potential liabilities that are possible but not probable of crystallising or are very difficult to quantify reliably are treated as contingent liabilities. Such liabilities are disclosed in the notes but are not recognized.
- IV. Fair value measurement of financial instruments: When the fair values of financial assets and financial liabilities recorded in the Balance Sheet cannot be measured based on quoted prices in active markets, their fair value is measured using appropriate valuation techniques. The inputs for these valuations are taken from observable sources where possible, but where this is not feasible, a degree of judgement is required in establishing fair values.
- V. Defined benefit plan: The cost of the defined benefit gratuity plan and the present value of the gratuity obligation are determined using actuarial valuations. An actuarial valuation involves making various assumptions that may differ from actual developments in the future. These include the determination of the discount rate, future salary increases and mortality rates. Due to the complexities involved in the valuation and its long term nature, a defined benefit obligation is highly sensitive to changes in these assumptions. All assumptions are reviewed at each reporting date.
- VI.Impairment of financial assets: The impairment provisions for financial assets are based on assumption about the risk of default and expected loss rates. The company uses judgement in making these assumptions and selecting the inputs to the impairment calculation, based on company's past history, existing market condition as well as forward looking estimates at the end of each reporting period.
- VII. Impairment of non-financial assets: The Company assesses at each reporting date whether there is an indication that an asset may be impaired. If any indication exists, the Company estimates the asset's recoverable amount. An asset's recoverable amount is the higher of an asset's or Cash Generating Units (CGU's) fair value less costs of disposal and its value in use. It is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets or groups of assets. Where the carrying amount of an asset or CGU exceeds its recoverable amount, the asset is considered impaired and is written down to its recoverable amount.

In assessing value in use, the estimated future cash flows are discounted to their present value using pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. In determining fair value less costs of disposal, recent market transactions are taken into account, if no such transactions can be identified, an appropriate valuation model is used.

#### VIII. Share-based payments:

Estimating fair value for employee stock appreciation rights (ESAR) requires determination of the most appropriate valuation model, which is dependent on the terms and conditions of the grant. This estimate also requires determination of the most appropriate inputs to the valuation model including the expected life of the share option, volatility and dividend yield and making assumptions about them. The assumptions and models used for estimating fair value for employee stock appreciation rights (ESAR) are disclosed in note 46.

#### **20. INCOME TAXES**

Indian companies are subject to Indian income tax on a standalone basis. Each entity is assessed to tax on taxable profits determined for each fiscal year beginning on April 1 and ending on March 31.

Statutory income taxes are assessed based on book profits prepared under generally accepted accounting principles in India adjusted in accordance with the provisions of the (Indian) Income tax Act, 1961. Such adjustments generally relate to depreciation of fixed assets, disallowances of certain provisions and accruals, the set-off of tax losses and depreciation carried forward and retirement benefit costs. Statutory income tax is charged at 25% plus a surcharge and education cess for the Companies having turnover less than 400 crores till previous year. The Company has adopted the concessional rate of tax 22% in line with tax laws (Amendment) Ordinance, 2019 in previous year itself & continues to follow in current year, which gives option to the Companies to adopt lower tax rate of 22% without claiming any exemptions and deductions.

NOTES TO THE FINANCIAL STATEMENTS

The major categories of plan assets of the fair value of the total plan assets are as follows

Investment with insurers 100% 100%

₹ in Millions

The principal assumptions used in determining gratuity obligations for the Companies plans are as shown below:

Particulars	Mar 31, 2021	Mar 31, 2020
Discount rate	7.18%	6.85%
Estimated rate of return on plan assets	7.18%	6.85%
	8% for first year	2% for first year, 8% for second year and 9%
Salary increase rate	and 9% thereafter	thereafter
Attrition Rate	6.00%	6.00%
		es mortality 2012-
Mortality rate during employment	2014	Ult.

#### Experience adjustments

₹ in Millions

Particulars	31.03.2021	31.03.2020	31.03.2019	31.03.2018	31.03.2017
Defined Benefit Obligation	15.14	14.37	12.25	10.26	8.48
Plan Assets	11.99	11.96	9.01	6.38	5.51
Surplus / (Deficit)	(3.15)	(2.41)	(3.23)	(3.88)	(2.96)
Experience Adjustments on Plan Liabilities - (Loss)/Gain	(0.36)	1.22	0.57	(0.93)	0.58
Experience Adjustments on Plan Assets - (Loss)/Gain	0.01	0.08	(0.15)	(0.03)	0.02

The estimates of future salary increases, considered in actuarial valuation, take account of inflation, seniority, promotion and other relevant factors, such as supply and demand in the employment market. The overall expected rate of return on assets is determined based on the market price prevailing on that date, applicable to the period over which the obligation is to be settled.

A quantitative sensitivity analysis for significant assumption is as below:

₹ in Millions

, , ,	•				
	Mar 31, 2021		Mar 31, 2021 Mar 31,		2020
	1% increase	1% decrease	1% increase	1% decrease	
Impact on defined benefit obligation (gratuity)					
Discount rate	(2.61)	1.24	(3.68)	(0.22)	
Salary increase rate	1.17	(2.58)	(0.29)	(3.66)	
Attrition Rate	(1.22)	(0.46)	(2.53)	(1.64)	

The sensitivity analyses above have been determined based on a method that extrapolates the impact on defined benefit obligation as a result of reasonable changes in key assumptions occurring at the end of the reporting period.

The average expected remaining lifetime of the plan members is 16.76 years (March 31, 2020 is 17.08 years) as at the valuation date which represents the weighted average of the expected remaining lifetime of all plan participants.

The following payments are expected contribution to the defined benefit plans in future years:		< in ivillions
	Mar 31, 2021	Mar 31, 2020
Within next 12 months	0.52	0.54
Between 2 to 5 years	2.70	2.84
Between 5 to 10 years	3.74	3.65
	6.96	7.03

#### Terms and conditions of transactions with related parties

The sales to and purchases from related parties are made on terms equivalent to those that prevail in arm's length transactions. Outstanding balances at the year-end are unsecured and interest free and settlement occurs in cash. There have been no guarantees provided or received for any related party receivables or payables. For the year ended 31 March 2021, the Company has not recorded any impairment of receivables relating to amounts owed by related parties. This assessment is undertaken each financial year through examining the financial position of the related party and the market in which the related party operates. The Company's material related party transactions and outstanding balances are with related parties with whom the Company routinely enter into transactions in the ordinary course of business.

## 41 Corporate Social Responsibility

As per Section 135 of the Companies Act, 2013, Company has made contribution to Suprajit Foundation, which is engaged in the activities of eradication of hunger and malnutrition, promoting education and healthcare listed under Schedule VII of the Companies Act, 2013. The utilisation of funds contributed to Suprajit Foundation are monitored by the Committee. Such Committee is responsible for identifying new projects, monitoring the progress of ongoing projects and the amount unspent until the projects are identified are placed by Suprajit Foundation with its Bankers.

#### NOTES TO THE FINANCIAL STATEMENTS

#### 42 Financial instruments fair value measurement

All assets and liabilities for which fair value is measured or disclosed in the Ind AS financial statements are categorised within the fair value hierarchy, Level 1: Quoted (unadjusted) market prices in active markets for identical assets or liabilities

Level 2: Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable.

Level 3: Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable.

#### Level wise disclosure of financial instruments

₹ in Millions

Particulars	Mar 31, 2021	Mar 31, 2020	Level
Investment in mutual funds(included in current and non current investments)			
- Carrying value	280.83	159.26	2
- Fair Value	280.83	159.26	2
Foreign exchange forward contracts			
- Carrying value	(4.59)	45.40	2
- Fair Value	(4.59)	45.40	2

The management assessed that fair value of cash and cash equivalents, other bank balances, loans, short term bank deposits, trade receivables, other financial assets (except foreign currency derivative contracts), trade payables, borrowings and other financial liabilities approximate their carrying amounts largely due to the short-term maturities of these instruments.

Derivative financial instruments - The Company enters into derivative contracts with financial institutions in nature of foreign currency forward contracts which are valued using mark to market valuation provided by financial institutions. The valuation includes foreign currency exchange rates in the active markets.

Investment in Mutual funds - The fair value of mutual funds determined using net asset value based on mutual fund statement.

NOTES TO THE FINANCIAL STATEMENTS

#### 43 Financial risk management objectives and policies

The Company Board of Directors responsible for overseeing the Risk Management Framework and developing and monitoring the Company's risk management policies. The risk management policies are established to ensure timely identification and evaluation of risks, setting acceptable risk thresholds, identifying and mapping controls against these risks, monitor the risks and their limits, improve risk awareness and transparency. Risk management policies and systems are reviewed regularly to reflect changes in the market conditions and the Company's activities to provide reliable information to the Management and the Board to evaluate the adequacy of the risk management framework in relation to the risk faced by the Company.

#### The Company's activities expose it to the following risks:

- a) Credit risk
- b) Liquidity risk
- c) Market risk

#### a) Credit Risk

Credit risk is the risk that counter party will not meet its obligations under a financial instruments or customer contract leading to a financial loss. The Company is exposed to credit risk from its operating activities (primarily trade receivables) and from its financing activities including deposits with banks and financial institutions, investments, foreign exchange transactions and other financial instruments.

#### i) Trade receivables

Customer credit risk is managed by the Company subject to the Company's established policy, procedures and control relating to customer credit risk management. The company uses judgement in making these assumptions and selecting the inputs to the impairment calculation, based on company's past history, existing market condition as well as forward looking estimates at the end of each reporting period. The maximum exposure to credit risk at the reporting date is the carrying value of trade receivable disclosed in note 10.

#### ii) Financial instrument and cash deposit

Credit risk is limited as the Company generally invest in deposits with banks . Investments primarily include investments in liquid mutual fund units.

#### b) Liquidity risk

Liquidity risk is the risk that the Company will encounter difficulty in meeting the obligations associated with its financial liabilities that are settled by delivering cash or another financial asset. The Company's approach to managing liquidity is to ensure, as far as possible, that it will always have sufficient liquidity to meet its liabilities when due, under both normal and stressed conditions, without incurring unacceptable losses or risking damage to the Company's reputation. Typically the Company ensures that it has sufficient cash on demand to meet expected short term operational expenses. The Company's objective is to maintain a balance between continuity of funding and flexibility through the use of bank loans/internal accruals.

NOTES TO THE FINANCIAL STATEMENTS

#### c) Market risk

Market risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in market prices. Market risk comprises two types of risk: interest rate risk and foreign currency risk. Financial instruments affected by market risk include borrowings, trade receivable and trade payable.

#### d) Interest risk

Interest rate risk is the risk that the fair value or future cash flows of the Company's financial instruments will fluctuate because of changes in market interest rates. The Company does not have significant debt obligations with floating interest rates, hence, is not exposed to any significant interest rate risk.

 1% decrease
 1% increase
 1% increase
 1% increase
 1% decrease

 Impact on profit before tax
 (3.82)
 3.82
 (5.32)
 5.32

#### Foreign Currency Risk

Foreign currency risk is the risk that the fair value or future cash flows of an exposure will fluctuate because of changes in foreign exchange rates. The Company's exposure to the risk of changes in foreign exchange rates relates primarily to the Company's operating activities. The company manage foreign currency exposures by undertaking forward contract on forecast basis. The board monitors the foreign exchange fluctuations on the continuous basis and advises the management of any material adverse effect on the Company. The company is exposed to EUR, GBP and USD currency risk.

#### Foreign Currency Sensitivity

A reasonably possible sensitivity of the Indian Rupee against Foreign currencies at March 31 would have affected the measurement of foreign forward exchange contract designated as cash flow hedges and affected equity and profit or loss by the amounts shown below. This analysis assumes that all other variables, in particular interest rates, remain constant and ignores any impact of forecast sales and purchases. Impact of hedging, if any has not been considered here. A 1% increase or decrease is used when reporting foreign currency risk internally to key management personnel and represents management's assessment of the reasonably possible change in foreign currency rate.

	Year Ende	d March 31,2021	Year Ended	March 31,2020

	5% increase	5% decrease	5% increase	5% decrease
Impact on PBT	0.18	(0.18)	0.22	(0.22)

#### 44 Capital management

The Company's objective is to maintain a strong capital base to ensure sustained growth in business. The Capital Management focuses to maintain an optimal structure that balances growth and maximizes shareholder value. The Company is predominantly equity financed. Further, the Company has sufficient cash, cash equivalents, current investments and financial assets which are liquid to meet the debts.

The Company monitors its capital using gearing ratio, which is net debt divided to total equity. Net debt includes, interest bearing loans and borrowings less cash and cash equivalents, Bank balances other than cash and cash equivalents.

Other equity	844.77	679.32
Total capital	864.67	699.22
Gearing ratio	0.43	0.72

- i) Equity includes all capital and reserves of the Company that are managed as capital.
- ii) Debt is defined as long and short term borrowings as described in Note 18 & 22

#### 45 Taxation

The Company has established a comprehensive system of maintenance of information and documents as required by the transfer pricing legislation under section 92-92F of the Income Tax Act, 1961. Since the law requires existence of such information and documentation to be contemporaneous in nature, the Company is in the process of updating the documentation for the transactions entered into with the associated enterprises during the financial year and expects such records to be in existence latest by due date as required under the law. The management is of the opinion that its transactions with the associated enterprises are at arm's length so that the aforesaid legislation will not have any impact on the financial statements, particularly on the amount of tax expense and that of provision for taxation.

#### 46 Share Based payments

#### **Employee stock Appreciation Rights:**

Under the 'Suprait Engineering Limited Employee stock Appreciation Rights Plan 2017' (SEL ESAR - 2017), which includes stock options, stock appreciation rights the holding company, at its discretion, may grant rights to purchase common stock to certain employees of the Company. Such stock appreciation rights typically vest one year but not later than five years from the grant date, have an life of up to 9 years. The fair value of share appreciation rights is estimated at the date of grant using the Black-Scholes-Merton ("BSM") pricing model, taking into account the terms and conditions upon which the share appreciation rights were granted. This model takes into consideration the following inputs that are required to compute the fair value of a stock option:

1) the exercise price of the option, 2) the fair market value of the underlying share, 3) the expected term of the rights, 4) the expected volatility of the price of the underlying share, 5) the expected dividend yield of the underlying share, and 6) the risk-free interest rate over the expected term of the option.

Expected volatilities under the BSM model are based on historic volatility, adjusted for any expected changes to future volatility due to publicly available information. The volatility is calculated considering the daily volatility of National Stock Exchange of India Ltd. (NSE) over a period prior to the date of grant corresponding with the expected life of the options. The expected term of the stock appreciation rights granted is the period of time for which the company expects the rights to be live. The risk-free interest rate being considered for the calculation is the interest rate applicable for a maturity equal to the expected life of the options based on the zero-coupon yield curve for government securities.

The expenses recognized for stock options during the year are shown in the following table:

	<u>mar 31, 2021</u>	<u>mar 31, 2020</u>
Expenses arising from equity-settled share-based payment transactions	2.15	0.28
Total	-	-

Suprajit Engineering Limited (SEL) ("the Holding company") cross charges the Company the amount of expense incurred as per IND AS 102 - towards stock based expense.

There is no options granted during the year 2020-21. The relevant details of the scheme are as below:.

Vesting period 1 - 5 years
Exercise period 5 years
Expected life 6.53 years
Exercise price Rs. 1

 $The following \ table \ illustrates \ the \ number \ and \ weighted \ average \ exercise \ prices \ (WAEP) \ of, \ and \ movements \ in, \ share \ rights \ during \ the \ year:$ 

Amount in Rupees

	Mar 31, 2021		Mar 31, 2020	
		Weighted		Weighted
Particulars		average		average
	No. of Options	No. of Options   exercise price	,	exercise price
		per stock		per stock option
		option (Rs.)		(Rs.)
Outstanding at the beginning of the year	74,988	1	74,988	1
Granted during the year	-	-	-	1
Forfeited during the year	-	-	-	-
Exercised during the year	-	-	-	-
Expired/lapsed/transfered during the year**	1,913	-	-	-
Outstanding at the end of the	73,075	1	74,988	1
Options exercisable at the end of the year	10,961	1	3,749	1

<sup>\*\*</sup>One employee has been transferred from SAL to SEL during FY 2020-21. Hence there is change in the outstanding options at the end of the year.

The weighted average fair value of options granted during the year is NIL.

The Black Scholes valuation model has been used for computing the weighted average fair value considering the following inputs:

	Mar 31, 2021	Mar 31, 2020
Risk Free Interest Rate	7.92%	7.92%
Expected Life (in years)	6.53	6.53
Expected Volatility	35.79	35.79
Dividend Yield	0.54	0.54
Exercise Price	1	1
Price of underlying share in market at the time of the option grant	257.65	257.65

NOTES TO THE FINANCIAL STATEMENTS

#### 47 Recent Indian Accounting Standards (Ind AS)

Ministry of Corporate Affairs ("MCA") notifies new standard or amendments to the existing standards. There is no such notification which would have been applicable from April 1, 2020. On March 24, 2021, the Ministry of Corporate Affairs ("MCA") through a notification, amended Schedule III of the Companies Act, 2013. The amendments revise Division I, II and III of Schedule III and are applicable from April 1, 2021. Key amendments relating to Division II which relate to companies whose financial statements are required to comply with Companies (Indian Accounting Standards) Rules 2015 are: Balance Sheet: • Lease liabilities should be separately disclosed under the head 'financial liabilities', duly distinguished as current or non-current. • Certain additional disclosures in the statement of changes in equity such as changes in equity share capital due to prior period errors and restated balances at the beginning of the current reporting period. • Specified format for disclosure of shareholding of promoters. • Specified format for ageing schedule of trade receivables, trade payables, capital work-in-progress and intangible asset under development.

If a company has not used funds for the specific purpose for which it was borrowed from banks and financial institutions, then disclosure of details of where it has been used. • Specific disclosure under 'additional regulatory requirement' such as compliance with approved schemes of arrangements, compliance with number of layers of companies, title deeds of immovable property not held in name of company, loans and advances to promoters, directors, key managerial personnel (KMP) and related parties, details of benami property held etc. Statement of profit and loss: • Additional disclosures relating to Corporate Social Responsibility (CSR), undisclosed income and crypto or virtual currency specified under the head 'additional information' in the notes forming part of consolidated financial statements. The amendments are extensive and the Company will evaluate the same to give effect to them as required by law.

- 48 The Indian Parliament has approved the Code on Social Security, 2020 which would impact the contributions by the company towards Provident Fund and Gratuity. The Ministry of Labour and Employment has released draft rules for the Code on Social Security, 2020 on November 13, 2020, and has invited suggestions from stake holders which are under active consideration by the Ministry. The Company will assess the impact and its evaluation once the subject rules are notified and will give appropriate impact in its financial statements in the period in which, the Code becomes effective and the related rules to determine the financial impact are published.
- 49 COVID-19 pandemic has resulted into widespread social and economic disruptions across the world leading to unprecedented situations. As per internal management assessment, the possible/probable impact of this pandemic on the business is not significant and we do not expect any material impact on the financial statements as a result of this since our sales are substantially export sales and we do not anticipate any cancellation of export orders. Hence, in our opinion there is no uncertainty on the going concern aspect.
- 50 As on March 31, 2021, the Company has an investment of Rs. 43.99 million in Franklin Templeton Mutual Fund (FTMF), valued at Net Asset Value (NAV) of Rs. 51.60 millions as on said date. FTMF has voluntarily decided to wind up six of its fixed-income debt schemes effective April 23, 2020 and FTMF has communicated that NAV per unit will continue to be computed and declared as per the same accounting and valuation principles as done prior to April 23, 2020 without any change. In preparing the financial statement, the Company has made an assessment and made a provision of Rs. 10.58 million, on a best estimate basis, as an exceptional item in the Statement of Profit & Loss, factoring regular updates given by FTMF, maturity profile of schemes and other factors such as historical yield, expected future returns from the underlying investments made by the funds etc. Given uncertainity in collection of remaining investments, the said provision has been continued in the books and will be reversed once all amount due from FTMF is recovered.
- 51 The Previous year figures have been regrouped/reclassified wherever necessary to make them comparable with the current year's classification/disclosure.
